## NOTICE TO PRODUCERS

Due to continuing increased demand and growth, SaskMilk is implementing a **quota increase of 1% effective October 1, 2014.**

Once again, we would like to recognize that producers have done an excellent job of increasing production in response to the significant challenge of increases over this past year.

Both the province and the western pool continue to need additional milk production to meet our commitments to the system. We encourage all producers to consider whatever methods are at their disposal to meet their production requirements, which may include:

- Transferring credits;
- Use of fat promoters;
- Increasing herd size;
- Sale of quota.

It is crucial that each and every producer do everything possible to avoid falling to a level of under-production that could cause the province to lose provincial credits (and therefore future production).

If you have any questions, please do not hesitate to contact Directors of the Board or the SaskMilk office. Director contact information is available in the monthly newsletter and on the website at <http://www.saskmilk.ca>.
