Notice to Producers CHANGES to 2018 Quota & Incentive Days

The Western Milk Pool (WMP) Provinces (B.C., Alberta, Saskatchewan, and Manitoba) have collectively agreed to slow our rates of production growth due to processing capacity limitations. As was mentioned in the previous announcement, we anticipate the processing situation in the WMP to improve in mid-to late-2019 (more information will come on this in the near future), but right now it is important to adjust our growth to the market limitations.

The planned growth will still be needed in the future, so this slow-down is a 'pause' on our rate of growth. As you know, **Saskatchewan producers have received 13% in increases over the past year, and 19% over the past two years.** The August to December increases below will be reviewed continuously, and further adjustments or postponements may be made. It is important to note that Saskatchewan is still committed to fulfilling our production obligations under the national system, but with adjusted timing.
